Summary

Probable Prehistoric or Roman enclosures, boundaries and a trackway, perhaps the remains of a settlement, seen as cropmarks.

Status

Other Identifiers

MORPH2 – LI.316.1

MORPH2 – LI.316.3

Notes

Probable Prehistoric enclosures and boundaries, possibly the remains of a settlement, were seen as cropmarks and mapped from air photographs. An asymmetric polygonal enclosure with a possible funnel entrance, or driveway, in its east side, is centred at TF 2356 9700. Attached to the inside of its west side is a rectangular enclosure, 50m by 15m. The settlement is situated on a north and west facing slope of a dry valley. Fragments of a boundary cross the valley from the settlement, and are centred at TF 2340 9697. An incomplete subcircular enclosure, (see TF 29 NW 36), is partially visible directly across the valley from the settlement but no obvious association between the features is visible. (Morph No. LI.316.1.1–2, 3.1)

Summary

Probable Prehistoric or Roman enclosures and boundaries seen as cropmarks.

Status

Other Identifiers

MORPH2 – LI.316.5

MORPH2 – LI.316.6

Notes

Probable Prehistoric or Roman enclosures and boundaries were seen as cropmarks and mapped from good quality air photographs. A NE–SW oriented linear arrangement of four conjoined rectilinear enclosures are visible, on a west facing slope overlooking a dry valley. They measure on average 40m by 25m and are centred at TF 2482 9646. The enclosures are attached to a ditched boundary 220m long. Another boundary, perpendicular to the first one partially encloses the enclosures. Fragments of boundaries to the south, measuring on average 40m, may relate to the enclosures.
