Premises of Mr. Francis Iles, at Wold Newton, on THURS-
DAY, the 8th Day of September, 1853, upwards of SEVENTY
superior Leog-Wool RAMS, consisting principally of Shearlings.

The general estimation in which the WOLD NEWTON RAMS

fully testifies to their merits, as combining size, symmetry,
wool, and mutton, and the judicious crosses of blood which
have been used periodically for the last twenty years, have
greatly improved their constitution and quality. Messrs.
WINDER and MASON therefore solicit their Friends and the
Breeders of Sheep, to an inspection of the Rams on the day of
Sale, as from experience they can recommend them.

Morning Trains, at the North Thoresby Station on the East
Lincolnshire Railway, returning to meet the Trains in the
